1. Write a Celsius to Fahrenheit function and a Fahrenheit to Celsius function. Put both function after main function. Also write prototype of these two functions before main function. Write this program in C++ language, then compile using g++ compiler and run. Using both Dev C++ and command line compilation and run.

   So, the program format should be

   #include …….

   using ….

   /* prototypes */

   /* global data declaration */

   int main(){ …. }

   double celsius_to_fahrenheit(){ …. }
   double fahrenheit_to_celsius(){ …. }

2. Write the same program in C syntax and save to a .c file, compile using gcc compiler and run. Using both Dev C++ and command line compilation and run.

3. Finish Solo Learn C++ module 1 practices.

Module 1: Basic Concepts

1	What is C++	?	1
2	Hello, World!	?	6
3	Getting the Tools	?	2
4	Printing a Text	?	5
5	Comments	?	3
6	Variables	?	4
7	Working with Variables	?	5
8	More on Variables	?	2
9	Basic Arithmetic	?	7
10	Assignment and Increment Operators	?	6
11	Module 1 Quiz	?	5
